MESSAGE FROM GROUP C.E.O

Dear Valued Customer,

We would like to take this opportunity to introduce you to our business, as we seek to be your vendor of choice. Furthermore, we would like to reconnect you with our business. We are a legal entity duly registered in Zimbabwe, having traded as STAR-DELTA ELECTRIX since 1994 then registered as STAR-DELTA ELECTRIX (PVT) LTD in accordance with Zimbabwean Company Laws in June 2014. The need to expand our reach beyond the Zimbabwean borders has necessitated the opening of STAR DELTA ELECTRIX (PTY) LTD in South Africa in July 2021—a unit duly moreover, registered in terms of South African Company Laws.

We are a specialist authorized distributor of domestic, industrial and mining flow control systems, electrical switchgear products, electrical contractors, projects specialists, consultants, engineers and electrical switchboard manufacturers who have conducted massive and complex projects in the SADC regional countries of Zimbabwe, Zambia, Tanzania and Mozambique with experience in the same countries spanning over a decade.

Attached, a comprehensive profile with a full description of the company, structure and relevant documentation, complete with references of major assignments undertaken during the last ten years. Profiles of key professional staff are also indicated. You may also visit our website www.stardelta.net for a more detailed insight into our products and services. We trust that this will meet your expectations and hope to establish a long term business relationship with you.

Yours faithfully,

Honest Chida

GROUP C.E.O

COMPANY BACKGROUND

Star Delta Electrix was originally equipped to supply basic electrical requirements to the domestic and industrial markets. In the last ten years however, the range of products available have become more diverse and varied. The introduction of an open market, easier accessibility of imported goods and the market saturation, led to the eventual decision of the specialization in certain products and eventual diversification into pre-paid smart water metering, particularly DIEHL Metering a German and French brand. Constant online liaison with manufacturers, suppliers, transport and clearing agents both within and beyond our borders ensures that products and components are made available to the customer effectively and reasonably.

Through the efficient and reliable service of our qualified and knowledgeable sales representatives and equally experienced, projects team, Star Delta is able to provide a quality range of renowned products and workmanship both to customers within and outside of main cities and towns. Customers around Zimbabwe, South Africa and beyond, all benefit from the service, and technical advice provided by these sales representatives. Considering Zimbabwe and South Africa's renowned mineral wealth, approximately 75% of all Star Delta's business dealings are carried out with the mining sector, agreeably a specialized field within itself.

Training plays an important role in the day to day running of the company. The management firmly believes that complete knowledge and knowhow of a product is absolutely vital in its sale. Training is not only carried out in-house, where staff members and customers are introduced and lectured on the product; but also at customer premises outside of the main cities. These training programs are set up in conjunction with the product supplier who inevitably sends experienced personnel to lecture and demonstrate the product.

To ensure customer awareness, Star Delta Electrix markets itself through the public media as well as exhibiting at various regional shows. Depending on the location and the reasoning behind the show, Star Delta will adjust accordingly and exhibit the range of products and services available to fit in with the show's particular theme. These shows have been successful in not only securing future sales and projects, but familiarizing both the businesses and the public with the company, its products and the services available to the customer.

Star Delta offers a flexible credit facility controlled by the in-house computerized accounting system. All statements, invoices and receipts are systematically printed and distributed by the up to date accounting system. Star Delta has a same day delivery service. Deliveries within the Gauteng areas are carried out free of charge. The company also packs for courier services and rail for deliveries outside of Gauteng.

STAR-DELTA ELECTRIX ZIMBABWE

SMART METERING

After extensive research in the field of smart/energy metering, Star-Delta has collaborated with several brands that specialize in smart meters in order to identify the best fit for Zimbabwe as well as the SADC region. This research led to a relationship with Diehl Metering being established. Star-Delta Electrix was appointed Sole Official Distributor and Agent of Diehl Metering for Zimbabwe and the SADC region. Not only are Diehl meters the solution for non-revenue water, but they are also smart meters that offer automatic meter reading (AMR) as well as the STS prepayment system.

RESEARCH AND DEVELOPMENT (R&D)

Since 2012, Star Delta Electrix has conducted extensive research on prepayment smart energy metering, with a strong emphasis on water and electricity. Over the past six years, we have dedicated our efforts to finding the most suitable technology and model for Sub-Saharan Africa, with a specific focus on Zimbabwe. It is important to note that our company has been widely recognized for delivering turnkey solutions since 1994. We prioritize meticulous studies and research to ensure that we offer products and services of the highest technology and quality, leaving nothing to be desired. We never take shortcuts.

However, despite our efforts, we remained unconvinced that the technology we encountered was the best fit for our market. Consequently, we continued our search, which led us to Germany—the global hub of technology. We invested significant time in studying the technology, undergoing product training, and observing the manufacturing and testing processes at their factories in Germany and France. Through further research, we became convinced that Diehl was the ultimate choice for Zimbabwe. As a result, we were appointed as the sole official distributor and agent of Diehl Metering for Zimbabwe, a product whose superiority we can confidently prove. Diehl meters not only provide a solution for non-revenue water but also utilize the STS system for prepayment, two qualities currently unmatched by any other meters offered in Zimbabwe.

To summarize, our journey took us to Germany, where we thoroughly explored Diehl Metering's technology and operations. This meticulous research and evaluation process have instilled the confidence in us that Diehl meters are the optimal choice for Zimbabwe, offering unparalleled performance and functionality tailored to the specific needs of our market.

- High quality metrology technology was used to produce the Diehl Meter.
- The less resistance to water turbidity of the Diehl Meter as compared to other meters in the market.
- The Diehl Meter has superior filtration and particle retention capabilities.
- The Nominal Flow Rate of the Diehl Meter which, at 2.5 m³ /hr is much higher compared to that of the other meters in the market, which is normally 1.5 m³ /hr or below.
- The grooved piston chamber on the Diehl Meter allows sand and other particles to go through without jamming the meter whereas other meters on the market have a smooth piston and chamber, which in the event of sandy water and other particles passing through the meter, the meter gets jammed and becomes dysfunctional.
- The ability of our Diehl Meter to count micro leakage because of a starting flow rate which is as low as 0.5 litres/hr thereby accounting for Non Revenue Water whereas the starting flow rate of other meters in the market is as high as 3.7 litres/hr and above.
- Unlike other meters on the market, the Diehl meter has a dry register, which keeps microbacteria from developing inside the meter.
- Due to the ability of our Diehl Meter to resist any magnetic forces the meter cannot be jammed or affected by magnets.
- The grooved outside casing design of the Diehl Meter allows it to withstand higher pressure unlike other designs of meters in the market.
- The Diehl meter comes in brass form as well as composite NOT Plastic like others in the market. The fibreglass reinforcement on the composite Diehl Meter ensures longer durability than the plastic used on the other meters in the market.
- The Diehl Meter has a modularity clip on module with pulse output or radio to turn it into a smart meter and pre payment system. This means councils will have the flexibility to either use the conventional post paid system or in the event the council decides to upgrade and migrate from conventional to smart and prepaid in future, the meter is already prepaid smart capable and compliant!

AUTOMATIC METER READING (AMR)

AMR can be done by your refuse trucks without them knowing as they move around collecting garbage; the data concentrators fitted on them will also be collecting and sending data to the revenue hall after every few seconds/minutes remotely. Automatic meter reading can also be done by drive by as well as through strategically located towers that use solar energy. This way you save time and money by eliminating the need for employing a lot of meter readers and using estimates.

We have also done demonstrations on how our pre payment is the best and second to none as it does not need a 20 digit token that one physically punches onto the meter or interface unit as with other systems, like the ZESA system. Our system works like a cell phone. You walk into any supermarket, revenue hall, fuel station or using Ecocash payment platform, and the moment you complete your purchase, the system immediately, within seconds, communicates with the meter and the valve opens and dispenses water. This happens from wherever you might be. No need to go home and punch in numbers on a token. Now that is revolutionary! The perfect solution that brings convenience to the customer and the council.

The system also has two way communication system unlike others with just one way.

All scientific evidence from laboratory tests that were conducted on all the meters and systems on the market and a detailed comparison of these with our Diehl Meter is readily available upon request.

SWITCHGEAR DISTRIBUTION AUTOMATION & CONTROL

Switchgear is comprised of electrical disconnect switches, contactors, fuses and circuit breakers used to control, protect and isolate electrical equipment. Switchgear is also used to deenergise equipment to allow work to be done and clear fault. Star-Delta Electrix is a specialist authorised distributors of domestic, industrial electrical switchgear products, electrical contractors, projects specialists, consultants, engineers and electrical switchboard manufacturers. We have conducted massive and complex projects in the SADC regional countries of Zimbabwe, Zambia, Tanzania and Mozambique with experience in the same countries spanning over a decade.

TRANSFORMER MAINTENANCE & OIL REGENERATION

In collaboration with GlobeCore, a company based in Germany, this division deals with transformer maintenance. This involves oil purification, regeneration of contaminated transformer oil and cleaning of wire winding and paper insulation as well as draining of sludge build-up among others. The CMM-R systems are designed to extend transformer service life by restoring the dielectric strength and chemical composition of dielectric insulating oil.

The major benefit is that it improves transformer performance and lifespan. The technology unravelled through the collaboration with Globecore, goes a step further. All the parameters of the oil are restored such as dielectric strength of transformer oil and all other parameters. While the oil will be regenerated, the inside of the transformer will also be cleaned and sludge build up will be drained simultaneously. The operations are set up so as to be performed in all environments. This Transformer Maintenance process increases the transformer service life by more than forty years.

This process completely regenerates used transformer oil to make it almost as good as new. The process also makes it possible to fill transformers with oil that would previously have required disposal. The oil in the transformer can be used without replacement for the entire service life of the transformer. It goes beyond the purification process by also removing water and other acids and particulate matter from the oil and the rest of the transformer, including wire winding and paper insulation. The oil is clarified, oxygen stability is improved and gas solvency is reduced.

LUBRICANTS

Star Delta Electrix conducted extensive research and travelled to several countries in search of the most sustainable range of lubricant products that can cater to consumer requirements. Star-Delta Electrix successfully managed to be appointed official distributors for ENOC—a company based in Dubai.

The product range is comprised of lubricants for the industrial, automotive, mining, marine and construction sectors. It is a diverse portfolio of lubricants and greases designed for application in industrial, heavy duty diesel engines, commercial and automotive use.

RENEWABLE ENERGY

In collaboration with German based SMA Solar Technology, a leading specialist in photovoltaic system technology, Star-Delta Electrix is providing a decentralized, digital and renewable energy supply.

Solar energy is proving to be the most cost effective energy source worldwide. Through collaborating, the technology discovered is connecting photovoltaics with storage, e-mobility and other sectors that integrate into the complete system. Star-Delta Electrix locally supplies products such as solar panels, hybrid inverters- including off grid and grid tied, solar batteries (Gel and Lithium-Ion), and commercial power storage solutions among many others.

The solar inverters are easily applicable for all module types for grid-connection and feeding into stand-alone grids, for small house systems and commercial systems in the Megawatt range. They also supply solar powered pumps for boreholes.

PUMPING

Star-Delta Electrix pumping division strives to provide pumps of the highest level of performance and efficiency. This is ideal for recirculation and conditioning systems, water supply and pressurization units. This allowed us to be appointed the sole authorized distributors for SAER Elettropompe, a company based in Italy.

CONTRACTING

Star Delta Electrical Contracting Division can assist you with any size domestic, industrial or mining installation. Since 1994, our high levels of expertise, together with years of experience have earned us a respected name in the "Electrical Installation World". With the advent of the need for more sophisticated ways of water conservation however, and in partnership with a renowned European manufacturer of pre paid smart water meters DIEHL Metering, Star Delta has successfully diversified into the flow control business. Zimbabwe's municipalities have expressed absolute satisfaction and confidence in our Diehl pre paid smart water meter and our Utility Systems software and billing platform package.

Star Delta Electrix is a registered member of Zimbabwe Electrical Switchboard Manufacturers Association. With the support of our "Distribution" and "Switchboard" divisions, we are able to offer quality "Turnkey" services to your exact requirements.

MOBILIZATION TIME

Star Delta has been involved in numerous projects of various magnitudes hence setting up for a project is one of the tasks we perform with ease. Identification and orientation of manpower that will participate in such a project is a process that we will undertake. High levels of professionalism will be practiced to ensure appreciable levels of safety when tackling the project. From experience, three days for small jobs and a minimum of one week for more complex ones is more than sufficient to fully meet our customers expectations.

Depending on the project budget and the urgency of the project, Star Delta is highly flexible in mobilization of manpower and materials. Even if most suppliers for such projects may not be in Zimbabwe, Star Delta has the capacity to gather materials in a minimum period of five working days depending on the project size and quantum of materials.

Procurement is not a daunting task for Star Delta as it is an official distributor of various electrical component manufacturers. We are the official licenced distributor of Diehl Metering, Utility Systems, GlobeCore , Hellerman Tyton, Rayvos, Benedict & Jager, Schneider, Jointmaster, Omron, Telux and BMG. The above mentioned are reputable and respected companies in the flow control and electrical fields which provide products and services of unquestionable quality. In all projects Star Delta has accomplished, it supplies and installs mostly products that it distributes because product quality is then guaranteed.

Capacity & Capability

Having performed installations of mega structures and complex instrumentations, Star Delta is not hesitant but rather eager to showcase our capability and capacity on other challenging projects as our primary objective remains to provide "Turnkey" solutions to our valued clients.

Project Lead Time

As always indicated by our Gantt charts for specific projects we always anticipate the completion of projects to be within the shortest possible time frames. This is assuming availability of materials and non delays on related logistics.

HEALTH, SAFETY AND ENVIRONMENT

Company Quality/Safety and Environment Systems

The company attained membership with Zimbabwe Electrical Switchboard Manufacturers Association due to the fact that it had proved high levels of competence in terms of quality standards. The electrical workshop and field works abide by the NSSA conditions of factory safety and Star Delta equipment and machinery undergoes periodic safety check ups.

The company has policy standards that it maintains in all its operations. Below are some of the key components contained in the policy systems. The safety and health of every employee is a high priority. Management accepts responsibility for providing a safe working environment and employees are expected to take responsibility for performing work in accordance with safe standards and practices. Safety and health will only be achieved through teamwork. Everyone must join together in promoting safety and health and taking every reasonable measure to assure safe and good working conditions in the company.

The best Safety and Health Programs involve every level of the organization, instilling a safety culture that reduces accidents for workers and improves the bottom line for managers at the same time doing sustainable environmental management. When Safety, Health and Environment are part of the organization and a way of life, everyone wins.

MIMOSA CONCENTRATOR PLANT OPTIMISATION

The project was successfully completed in March 2023 at the Mimosa Concentrator Plant where we were doing all of the electrical and instrumentation installations. The project was projected to stretch until the end of April this year (2023), having begun last year in September.

NGEZI THIRD CONCENTRATOR PLANT(2022)

In the past year, for the last half of the year, we took part in the Third Concentrator Plant Expansion Project that took place at ZimPlats in Ngezi. This project stretched from June until December 2022. We also performed the tasks of doing all of the electrical and instrumentation installations at the site. We completed the project well within the stipulated time period and this resulted in the customer being very satisfied with the services we provided.

PAMOJA MINING COMPANY LTD, TANZANIA (2013)

Star Delta was proudly involved in the commissioning of the elution plant in Tanzania in conjunction with Mina Nawe Trading. Star Delta was allocated the responsibility to supply and install the generator supply panel and to supply and install the main MCC. Installation of water tanks and pumps supplied by the mine were also done by Star Delta. General lighting and electrical plant lighting was adequately supplied and installed on this project which took 3 weeks to complete.

SWITCHBOARD MANUFACTURING

Star-Delta Electrix is a registered member of The Zimbabwe Electrical Switchboard Manufacturers Association(ZESMA) and The Zimbabwe Electrical Contractors and Suppliers Association(ZECSA) They run a switchboard manufacturing plant which specialises in

- Process Control
- Motor Control Circuits
- Generator Control Circuits
- Distribution Boards
- The production services include specifying:
- The customer requirements
- Designing the product as per customer requirement
- Carrying out equipment procurement and board assembly
- Testing performance at the end of the manufacturing process
- Performing quality control checks and dispatch

ARMATURE WINDING

This division deals with rewinding of all transformers and electric motors (low voltage, high voltage as well as DC motors). We have successfully opened up a workshop in Bulawayo which encompasses all the necessary equipment required. Our lifting capacity goes up to a maximum of 30 Tonne. We are leaving no stone unturned in our pursuit to provide a premium service. We have a Baker Tester available which immensely assists in winding analysis.

This tester has many features, but to name a few—it allows for testing the strength of the insulation on the conductor, test the inter turns between the phases as well as testing the float insulation strength. We have state of the art ovens that ensure the varnishing process is done immaculately. Our staff manning this division are highly experienced in armature winding, having been in the trade for almost forty years as well as having understudied previously well-established companies.

Enterprise Address	1553 Chestnut Road Zonnehoeve Roodepoort

- I hereby declare under oath that:
 - The enterprise is 95 % black owned;
 - The enterprise is 45 % black woman owned;
 - Based on the management accounts and other information available on the 28/2/22 financial year, the income did not exceed R10,000,000.00 (ten million rands);
 - Please confirm on the table below the B-BBEE level contributor, **by ticking the applicable box.**

100% black owned	Level One (135% B-BBEE procurement recognition)	
More than 51% black owned	Level Two (125% B-BBEE procurement recognition)	✓
Less than 51% black owned	Level Four (100% B-BBEE procurement recognition)	

- The entity is an empowering supplier in terms of **the dti** Codes of Good Practice.
- I know and understand the contents of this affidavit and I have no objection to take the prescribed oath and consider the oath binding on my conscience and on the owners of the enterprise which I represent in this matter.
- The sworn affidavit will be valid for a period of 12 months from the date signed by commissioner.

Date: 2021-09-17

Dear Representative Taxpayer

NOTICE OF REGISTRATION

The South African Revenue Service (SARS) confirms registration of the following taxpayer:

Registered name: STAR DELTA ELECTRIX
Trading name: STAR DELTA ELECTRIX
Taxpayer registration number: 2021/706065/07
Taxpayer reference number: 4350300333
Date of Registration: 2021-09-17

Your tax obligation

The taxpayer has been registered for Value-Added Tax with effect from 2021-09-17 and a 2 month(s) tax period with the following category has been allocated:

Periods of two months ending on the last day of February, April, June, August, October and December.

The taxpayer must use the Invoice basis to account for the tax payable.

Payments in respect of VAT must be made under cover of a VAT 201 return to SARS by the 25th of the month after the end of the tax period. eFilers have until the last business day of the month to make payment. If payment is not paid in full by the due date, a ten percent penalty and interest at the prescribed rate is levied.

Where the payment date falls on a weekend or public holiday, the due date is the last preceding business day.

Kindly notify SARS of any change to your registered particulars within 21 business days of such change.

Should you have any queries please call the SARS Contact Centre on 0800 00 7277. Remember to have your taxpayer reference number at hand when you call to enable us to assist you promptly.
